Instructions

Create frame using "wreath back" (plain circle) and wreath. Remove the paper from the wreath back and place image (photo) in center leaving enough room along the outside edges to adhere to the wreath.

Center the "wreath back" behind the wreath so image (photo) is centered. Adjust and press edges into place behind the wreath.

Decorate wreath as shown: gently separate foam bulbs, banner and bow. To finish, loop string through hole on wreath and tie.
